

Admin Manual

Self-Hosted Admin Manual

First Time Setup

After installation, visit your app URL and register the first admin account. This account has full access to manage users, settings, and branding.

User Management

Navigate to Admin then Users. You can invite new users by email, set roles, deactivate accounts, and reset passwords.

Branding Configuration

Navigate to Admin then Branding. Customize app name, colors, logo URL, font family, tagline, and email templates. Changes apply immediately.

AI Agent Configuration

Your deployment includes four AI agents: Career Coach, Job Scout, Skills Builder, Budget Guide. All use OpenAI GPT-4o and follow the built-in knowledge base and guardrails.

Monitoring

docker compose ps - see running services
docker compose logs app - view app logs
docker compose logs db - view database logs

Backups

Back up: `docker exec postgres pg_dump -U platform platform > backup.sql`
Restore: `docker exec -i postgres psql -U platform platform < backup.sql`
