

# Installation Guide

## Self-Hosted Installation Guide

### Before You Begin

You will need a server running Docker 24+ and Docker Compose 2+, a domain name pointing to your server, your license key from [app.myworkforceteamtechnology.com](https://app.myworkforceteamtechnology.com), and API keys for OpenAI, Twilio, and Resend.

### System Requirements

Minimum: 2 CPU cores, 2 GB RAM, 10 GB disk. Recommended: 4 CPU cores, 4 GB RAM, 40 GB disk.

### Installation Steps

Step 1: Download the distribution package. Log in at [app.myworkforceteamtechnology.com](https://app.myworkforceteamtechnology.com), go to License Keys, click Download .zip.

Step 2: Extract the package on your server using unzip.

Step 3: Run the setup script with `chmod +x setup.sh` then `./setup.sh`. The script will prompt for your license key, domain, OpenAI API key, Twilio credentials, and Resend API key.

Step 4: Verify by visiting `http://your-domain:5000` in a browser.

Step 5: Configure nginx or Caddy as a reverse proxy for HTTPS.
